https://tedkeim.github.io/updated-portfolio/

Technical Skills:

- **HTML**
- **CSS**
- **Javascript**
- **JQuery**
- **Node.Js**

Exemplary Projects:

https://emmettrr.github.io/project-1/

This project was a collaborative group effort. When you search for an MMA fighters name, data that we pulled from an API will show on the screen so you can see all of that persons statistics.

Languages used:

- HTML
- CSS
- Javascript
- JQuery

https://tedkeim.github.io/code-quiz/

This project is an example of an online quiz. It has 10 questions and includes a timer. Whenever you answer a question incorrectly, 10 seconds get deducted from your time. It also includes a high score page, that utilizes local storage to save your recent high scores.

Languages used:

- HTML
- CSS
- Javascript

https://tedkeim.github.io/DayPlanner/

This project is a day planner. It uses moment.JS to recognize what time it currently is and changes color based on the hour of the day. Whenever the hour passes on the day planner, that particular block turns red. The block is grey for the

current hour.

Languages used:

- HTML
- CSS
- Javascript
